

## Milligan Bio-Tech

### Finalist for the WorkSafe Saskatchewan Award for Job Creation

Milligan Bio-Tech, based in Foam Lake Saskatchewan, is a producer of Bio-diesel and Bio-diesel related products. The company has four products in the marketplace as well as others in research and development. The existing products consist of bio-diesel, diesel fuel conditioner, penetrating oil and road dust suppressant.

Since production began in 2001, Milligan Bio-Tech has grown at a tremendous rate, nearly doubling its sales every year. Milligan Bio-Tech has increased its full-time staff from 10 in 2006 to 27 in 2008 with 2 part-time employees starting in 2007.

The company believes it still has potential to grow its staff as they are not yet at full production levels in the bio-diesel plant and they have draft plans for an even larger plant and other crushing plants.

Milligan has attracted employees from out of town and province and offers a variety of training initiatives to support onsite safety and customer service.
