

WSE Technologies Finalist for the SaskWater Award for the Environment

WSE Technologies is a Saskatoon based company committed to sustainable energy. As a dealer and designer of alternative energy technology, WSE is in the thick of the movement towards economically viable green energy. Providing solar and wind technology, batteries and LED lighting,

WSE offers an array of options for clients looking for off-grid solutions. Customers are provided with BTU meters so that they can monitor exactly how much they are saving with WSE Technologies solutions.

WSE Technologies is committed to alternative energy options and is passionate about sharing its information. WSE provides a wide variety of educational and training opportunities, from free webinars on the technical aspects of solar heating to intensive two day training seminars. The

company is so confident that it will remain competitive in this fast evolving sector that it shares research and designs, illustrating their commitment to improving the entire industry, not only their own systems.
