

## West Wind Aviation Finalist for the Enterprise Saskatchewan Award for Training Excellence

In 1983, West Wind Aviation was established as a two person, one-aircraft operation with a plan to provide corporate air charter service. Over the years, the scope of West Wind's service has grown to include maintenance, avionics, ground services, fueling, corporate aircraft management, first-class Aerocentre facilities, ExpressAir providing travel between Regina & Saskatoon and Pronto Airways servicing the North.

West Wind is Western Canada's largest full support aviation operation and was recently named one of Canada's 50 Best Managed Companies.

West Wind's success is built on its commitment to safety, customer service excellence, and a belief that its people are its most valuable resource and competitive edge. While significant training is required and regulated by the industry, West Wind's investments in training go above and beyond the requirements of the job, the industry, and/or its customers. West Wind provides in-house and off the job training opportunities and all of its employees have the opportunity to engage in training programs.
