

TinyEYE Therapy Services

Finalist for the MD Ambulance Care Ltd., Regina Qu'Appelle Health Region and Saskatoon Health Region Award for Health Innovation

TinyEYE Therapy Services has created a world class tele-health application that enables Speech Language Pathologists to treat patients in various regions across the World. TinyEYE provides Speech-Language Pathology services over the internet using software, web cameras, and headsets.

Conceptualized in 2005 by sister-brother partners Greg Sutton and Marnee Brick, TinyEYE initially sold licenses of their proprietary speech therapy telepractice software. However, in early 2008 TinyEYE evolved beyond being a technology vendor and created a remote speech therapy practice.

Acting like a private speech therapy practice, the company has attracted much more interest as the demand for Speech-Language Pathologists is high. TinyEYE's main office is in Saskatoon and comprises of a small, but efficient, dedicated team. In addition, TinyEYE now has Speech-Language Pathologists from Canada, The U.S, Barbados, The Netherlands, and The U.K, all working for the company from home as sub-contractors.
